Bureau — Information Security Engineer

Dear Hiring Team,

I am applying for the Information Security Engineer role at Bureau. My recent work has centred on cloud alert investigation and response, and I want to go deeper in cloud security.

At FICO I built an AI-powered cloud security investigation platform integrating Wiz, Python, GraphQL, AWS Bedrock and Amazon OpenSearch Serverless for automated alert enrichment and incident summarisation. It reduced MTTR by 80% and closes 80% of low-complexity cloud alerts automatically. I also architected our Detection-as-Code framework, which cut emergency deployment effort by 50%.

I am based in Bengaluru, open to in-office, hybrid or remote work and to relocation, and can join after a 60-day notice period. I would welcome the chance to talk through how I can contribute.

Sincerely,
Aditya Sapra
