Zeta — SIEM & SecOps Engineer II

Dear Hiring Team,

I am applying for the SIEM & SecOps Engineer II role at Zeta. Detection engineering is my day-to-day work, and I want to do it on a platform at your scale.

At FICO I architected a Detection-as-Code framework using Torq and Bitbucket that standardises version control, testing, deployment and rollback for Sigma, SPL, KQL, YARA and YAML detections, cutting emergency deployment effort by 50%. I also built an automated threat hunting pipeline that validates IOCs, enriches them with threat intelligence and ingests prioritised findings into Splunk, reducing manual analyst effort by 60%.

I am based in Bengaluru, open to in-office, hybrid or remote work and to relocation, and can join after a 60-day notice period. I would welcome the chance to talk through how I can contribute.

Sincerely,
Aditya Sapra
