Okta — Software Engineer, Professional Services R&D

Dear Hiring Team,

I am applying for the Software Engineer, Professional Services R&D role at Okta. Security and identity are the parts of my work I most want to go deeper in.

At FICO I modernised our core authentication architecture to zero-trust standards, integrating SSO, OIDC and MFA with backend systems to standardise user lifecycle management and session handling. As an intern I built a Security Compliance UI that brought Black Duck, Aqua, Checkmarx and KICS scan results into one place and cut vulnerability triage time by 50%.

I am based in Bengaluru, open to in-office, hybrid or remote work and to relocation, and can join after a 30-day notice period. I would welcome the chance to talk through how I can contribute.

Sincerely,
Rhythm Sharma
