Sarvam AI — Developer Relations Engineer

Dear Hiring Team,

I am applying for the Developer Relations Engineer role at Sarvam AI. I like taking a problem from a stakeholder's description to working software, and I want to do that directly with customers.

At FICO I built a monitoring UI for AI agents together with the reporting APIs behind it, and delivered login, MFA and password-management flows for enterprise web applications. My roles so far have been internal engineering roles rather than customer-facing ones, but I have owned features from requirement to production and worked closely with the teams who use them.

I am based in Bengaluru, open to in-office, hybrid or remote work and to relocation, and can join after a 30-day notice period. I would welcome the chance to talk through how I can contribute.

Sincerely,
Rhythm Sharma
