Google — Software Engineer II (YouTube)

Dear Hiring Team,

I am applying for the Software Engineer II (YouTube) role at Google. I enjoy owning features end to end, from the API to the interface, and I want to do that on a product used at YouTube's scale.

At FICO I built a monitoring UI for AI agents in React together with the reporting APIs behind it, and delivered login, MFA and password-management flows for enterprise web applications. As an intern I built a Security Compliance UI that cut vulnerability triage time by 50%, backed by Cypress end-to-end tests that caught regressions before release.

I am based in Bengaluru, open to in-office, hybrid or remote work, and can join after a 30-day notice period. I would welcome the chance to talk through how I can contribute.

Sincerely,
Rhythm Sharma
