Palo Alto Networks — AI Engineer, Agentic Systems (Quality Engineering)

Dear Hiring Team,

I am applying for the AI Engineer, Agentic Systems (Quality Engineering) role at Palo Alto Networks. Your team is moving quality engineering to an AI-first model, and my current work is exactly that intersection: evaluating and monitoring AI agents in an enterprise product.

At FICO I built the monitoring UI that tracks AI agent evaluation outcomes, pass/fail status and agent responses, and extended the Reporting Controller with the APIs behind it. That work gave the team one place to see how agents perform. I work with Amazon Bedrock and Langfuse, and I hold the AWS Certified AI Practitioner certification.

I am based in Bengaluru, open to in-office, hybrid or remote work, and can join after a 30-day notice period. I would welcome the chance to talk through how I can contribute.

Sincerely,
Rhythm Sharma
