DigitalOcean — Software Engineer II, Identity & Access Management

Dear Hiring Team,

I am applying for the Software Engineer II, Identity & Access Management role at DigitalOcean. Identity and access management is the part of my work I most want to go deeper in, and your team runs it on the critical path of every request.

At FICO I modernised our core authentication architecture to zero-trust standards, integrating SSO, OIDC and MFA with backend systems to standardise user lifecycle management and session handling. I also delivered the login, MFA and password-management flows that enterprise users see, so I have worked on identity from the protocol to the screen.

I am based in Bengaluru, open to in-office, hybrid or remote work, and can join after a 30-day notice period. I would welcome the chance to talk through how I can contribute.

Sincerely,
Rhythm Sharma
