Postman — Software Engineer II (Full Stack), Postbot AI

Dear Hiring Team,

I am applying for the Software Engineer II (Full Stack), Postbot AI role at Postman. I build AI-facing products across React, TypeScript and Python, and I use Postman daily, so working on Postbot is an easy role to be excited about.

At FICO I built a monitoring UI for AI agents in React together with the reporting APIs behind it, and delivered login, MFA and password-management flows for enterprise web applications. As an intern I built a Security Compliance UI that cut vulnerability triage time by 50%, backed by Cypress end-to-end tests that caught regressions before release.

I am based in Bengaluru, open to in-office, hybrid or remote work, and can join after a 30-day notice period. I would welcome the chance to talk through how I can contribute.

Sincerely,
Rhythm Sharma
