SUMMARY

Software Engineer with 2+ years at FICO, a financial-technology company, owning features from requirement to production. Shipped Python services and REST APIs on AWS, automated financial and usage reporting across regions, and removed manual release work worth 2 hours per sprint. Builds and evaluates AI agent tooling day to day.

SKILLS

Python, Java, JavaScript, TypeScript, SQL, RESTful API Design, Microservices Architecture, CRON-based Scheduling, AWS Lambda, AWS Step Functions, Amazon EventBridge, Amazon DynamoDB, Amazon ECS, Amazon S3, AWS CloudFormation, Amazon CloudWatch, AWS Systems Manager (SSM), Amazon SNS, Amazon SES, Athena, Glue, Docker, Jenkins, Git, uv (Python Dependency Manager), OAuth 2.0, OIDC, SSO, MFA, Session Management, Amazon Bedrock, Amazon SageMaker, Comprehend, Langfuse, Evaluation Rubrics Tracking, React, Cypress, AWS Certified AI Practitioner

EXPERIENCE

Software Engineer – Associate — FICO (Jul 2024–Present)

- Created a serverless Scheduled Reports module utilizing AWS Step Functions and EventBridge Scheduler to orchestrate distributed job execution.
- Built fault-tolerant, CRON-based execution tracking systems with robust cross-microservice event notifications, ensuring high availability.
- Designed and deployed highly scalable DynamoDB data aggregation pipelines to ingest, process, and analyze monthly financial and usage metrics across multiple global AWS regions.
- Enhanced the Reporting Controller with new APIs to support the monitoring UI and retrieve evaluation results and agent outputs.
- Automated complex multi-sheet Excel report generation and secure distribution workflows using Amazon S3, SSM Parameter Store, and Amazon SES.
- Led a critical infrastructure migration for backend services from standard pip to uv (a high-performance, Rust-based Python dependency resolver), enforcing strict dependency locking and standardized versioning.
- Slashed CI pipeline build times by 75% and completely fortified the software supply chain against unverified upstream vulnerabilities through this infrastructure optimization.
- Modernized core authentication architecture to meet strict zero-trust enterprise security standards, seamlessly integrating SSO, OIDC, and MFA with backend systems to standardize user lifecycle management and fortify secure session handling.
- Delivered end-to-end secure authentication workflows and responsive UIs for enterprise web applications, successfully deploying modern login flows, MFA screens, and password management systems that streamlined enterprise user access.
- Developed a monitoring UI for AI agents to track evaluation outcomes, including pass/fail status and agent responses.
- Integrated evaluation data into the frontend, enabling centralized visibility into agent performance and evaluation results.

Software Engineer – Intern — FICO (Jan 2024–Jul 2024)

- Provisioned scalable backend environments using AWS CloudFormation (Infrastructure as Code) and developed robust data extraction pipelines to surface backend database scan insights to the frontend layer.
- Integrated enterprise scanning tools including Black Duck, Aqua, Checkmarx, and KICS, successfully reducing global vulnerability triage time by 50%.
- Created a custom Jenkins CI/CD pipeline tailored for end-of-sprint agile releases.
- Automated version tagging and release branch creation, eliminating manual deployment toil and saving the core engineering team over 2 hours of manual effort per sprint.
- Authored and maintained comprehensive automated end-to-end (E2E) test suites using Cypress, significantly improving UI reliability and eliminating critical production regression bugs prior to deployment.
- Engineered a centralized Security Compliance UI using React that aggregated real-time vulnerability scan results across dozens of microservices.

EDUCATION

- Chitkara University, Punjab
- B.E. – Computer Science, 9.5 CGPA
- Vice-Chairperson, WIE IEEE Chapter
- Gold Medalist E-Sports Inter-College Championship (Valorant)
- State-level Chess Player
- C2S2 Reflection Member (Sketching & Craft)
- Vishvas Public School, Haryana
- 12th Grade (CBSE) – 93%

CERTIFICATIONS

- AWS Certified AI Practitioner, Amazon Web Services, Sept 2026 to Sept 2029
