SUMMARY

Software Engineer with 2+ years at FICO building backend services in Python and Java on AWS, AI agent evaluation tooling, and enterprise authentication (SSO, OIDC, MFA). Cut CI build times by 75% and vulnerability triage time by 50%. AWS Certified AI Practitioner.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Backend: Spring Boot, Node.js/Express, REST API design, Microservices, PostgreSQL/MySQL

AWS: Lambda, Step Functions, EventBridge, DynamoDB, ECS, S3, CloudFormation, CloudWatch, Systems Manager (SSM), SNS, SES, Athena, Glue

AI: Amazon Bedrock, Amazon SageMaker, LangChain/LangGraph, RAG and vector search, Prompt and evaluation design, Langfuse

Frontend and testing: React, Cypress

DevOps: Docker, Kubernetes/Terraform, Jenkins, Git, uv

Security and IAM: OAuth 2.0, OIDC, SSO, MFA, Session management

EXPERIENCE

Software Engineer, Associate — FICO, Bengaluru, India **(Jul 2024 – Present)**

- Built a React monitoring UI and the REST reporting APIs behind it to track AI agent evaluation outcomes (pass/fail status, agent responses), giving teams one view of agent performance.
- Wrote prompts, rubrics and evaluation datasets for AI agents and tracked evaluation results in Langfuse.
- Modernised core authentication to zero-trust standards, integrating SSO, OIDC and MFA with backend services and standardising user lifecycle management and session handling.
- Delivered login, MFA and password-management flows for enterprise web applications.
- Built a serverless Scheduled Reports module on AWS Step Functions and EventBridge Scheduler, with fault-tolerant CRON-based execution tracking and cross-microservice event notifications.
- Designed DynamoDB aggregation pipelines that ingest and analyse monthly financial and usage metrics across multiple AWS regions.
- Automated multi-sheet Excel report generation and secure distribution using Amazon S3, SSM Parameter Store and Amazon SES.
- Led the migration of backend services from pip to uv with strict dependency locking, cutting CI build times by 75% and hardening the software supply chain.

Software Engineer, Intern — FICO, Bengaluru, India **(Jan 2024 – Jul 2024)**

- Built a React Security Compliance UI aggregating vulnerability scan results from Black Duck, Aqua, Checkmarx and KICS across dozens of microservices, cutting triage time by 50%.
- Provisioned backend environments with AWS CloudFormation and built data extraction pipelines to surface scan data in the UI.
- Wrote Cypress end-to-end test suites that caught regressions before release.
- Built a Jenkins CI/CD pipeline that automates version tagging and release branch creation, saving the team over 2 hours per sprint.

EDUCATION

B.E., Computer Science — Chitkara University, Punjab **(Jul 2020 – Jul 2024)**

CGPA 9.5 · Vice-Chairperson, WIE IEEE Chapter · State-level chess player

CERTIFICATIONS

- AWS Certified AI Practitioner, Amazon Web Services (Sept 2026 – Sept 2029)
